

CRITICAL INFRASTRUCTURES RESILIENCE

Protection against physical and cyber attacks

CALL FOR PAPERS CIR 2025

November 11, 2025

Bordj El Bahri, Algiers

Overview

The first symposium on Critical Infrastructures Resilience (CIR2025) will be organized by the Ecole Militaire Polytechnique (EMP) in Bordj El Bahri, on November 11, 2025. This event will include plenary lectures, oral presentations and posters. CIR2025 aims to create a platform for academics, researchers and professionals, providing an opportunity to promote essential concepts, exchange experience and discuss latest advancements in the field of infrastructures protection against physical and cyber attacks.

We invite authors to submit extended abstracts summarizing their contribution, the adopted methodology and the obtained results. For this purpose, please use the template and the submission guide available on the symposium website.

Main Topics

- Emerging threats against critical infrastructures & AI-Assisted Terrorism
- Natural threats for critical infrastructures
- Protection against improvised explosive devices and UAVs
- Technologies for threat detection, monitoring and early warning
- Risk assessment, threat modeling, and mitigation strategies
- Physical protection strategies: Hardening critical infrastructures
- Advanced engineering techniques for the design of resilient infrastructures
- Cyber resilience and protection of digital infrastructures
